Gold Medal awarded "The New Dawn", by the American Rose Society for being the best hardy everblooming climbing rose.

The New Dawn

Plant Patent No. 1

A visitor to our fields this summer said, "It blooms and blooms", and it really does produce its nicely formed alabaster pink fragrant flowers from June until frost. The foliage is a rich dark glossy green and resistant to insects or disease. Hardy, attractive, everblooming profitable, you can recommend "The New Dawn".

All Out for Defense

As our nation girds itself for the job it has to do, some things are going to be difficult to get and we all must adjust ourselves to new conditions. Taxes and increased costs are all going to have a bearing on prices.

We hope we can maintain those listed in this catalogue but in view of the uncertainty reserve the right to make such changes as may be necessary from time to time.

STOCKS FOR FORCING

Seed of Stock for forcing has always been more or less unpredictable with regard to the percentage of doubles it will produce. Selection of the strongest plants, growing in rich soil and proper feeding has been standard practice, but even under these conditions sometimes the percentage of doubles is too low for profit. To use all possible safeguards, our grower plants a quantity of each lot of seed and any lot that does not prove up to standard, is discarded.

Careful comparative tests have proved that our strains are equal to the best available and we feel convinced that we can satisfy the most critical.

MAMMOTH FLOWERED COLUMN

New White

SNOW PEAK. Several years of trial convince us that this new white is one of the best in this color. The flowers are a snowy white, well placed on the stems and it will bloom two weeks earlier than all other column stock.

The percentage of doubles averages about 55% which is lower than most varieties, but careful selection of notched leaved plants will bring this up considerably.

ROSES

We recommend planting dormant roses in the Fall and very early spring. Experience has shown that results with dormant plants are very uncertain after April 1st, and for that reason we offer potted roses only in our spring list. Prices on this type of material are naturally higher but results are so superior, there is no question of value because the element of loss and complaint is practically eliminated.

IMPORTANT

PATENTED PLANTS—All patented plants offered in this catalog are sold by us under License from the Patent owners, and it is understood and agreed to by the purchaser that they are for resale at retail only. The asexual reproduction of patented plants is reserved by the Patentees and is strictly prohibited under provisions of the Plant Patent Act.

Purchasers of Patented and nationally advertised plants shall not list or sell them at less than the established price for the current season, and not less than three of a kind at the dozen rate. Nor include them in any collection offers, except in connection with other patented roses. Neither shall they be featured in any manner or form as a premium. Failure to comply with this policy will result in discontinuance of the supply.

RECENT INTRODUCTIONS

THE NEW DAWN—Plant Patent No. 1

First truly hardy, repeat blooming, climbing rose. Will give a continuous bloom from early summer until stopped by frost.

The dark green glossy foliage is ornamental at all times, and practically immune to insects and disease. The flowers are exquisite in form, delicate blush pink in color and excellent as a cut flower because of their long stems and intense fragrance.

A real door yard rose, it can be used as an arching shrub or to cover a trellis or wall. Truly a rose you can recommend.

HARDY PERENNIALS & ROCK PLANTS

Interest in hardy perennials is constantly increasing. Garden magazines and Garden Clubs are spreading the knowledge of the choicer items. The reasonable price at which most plants are sold is also a big factor in creating a demand that means profit to you.

Many items are valuable cut flowers and they usually bloom at a time when greenhouse material is scarce. A planting of cut flower items will repay many times its original cost, with the natural increase available for resale.

PRICES: 1-3 of a variety at the each rate which is 10c added to the 100 rate. 4-24 plants at 10 rate. 25 or more at 100 rate.
